Define the following words:

traction– The gripping action that keeps a tire from slipping on the roadway.

force of impact– The force with which a moving vehicle hits another object.

potential energy– Stored energy.

blowout– The sudden bursting of a tire.

kinetic energy– The energy of motion.

engine failure– Loss of power to the engine.

friction– The resistance between a vehicle's tire and the road surface.

gravity– The invisible force that pulls objects toward the ground.

skidding– Loss of control over the direction in which your car is moving because of reduced traction.

brake failure– Loss of braking power.

centrifugal force– The force that tends to push a moving object out of a curve or turn into a straight path

hydroplaning– Loss of traction where there is a film of water between the road and tires.
